

## Lab 26

```
1  #include <stdio.h>
2
3  int StudentInLectureClass(int PresentStudent);
4  int allStudent = 60;
5
6  main()
7  {
8      int num;
9      printf("Please input number : ");
10     scanf("%d", &num);
11     printf("\nStudent year 3 = %d\n\n", allStudent);
12     printf("Student in Lecture Class = %d\n\n", StudentInLectureClass(num));
13 }
14
15 int StudentInLectureClass(int PresentStudent)
16 {
17     int allStudent = 0;
18     allStudent = allStudent + PresentStudent;
19     return allStudent;
20 }
```
